Introduction

Gopinath Juba Sangha (GJS) was established on 1st April 1974 and it was legally registered under the Societies Registration Act XXI of 1860. GJS is one of the leading pioneer non-government, non-profit making, non-political and social service oriented organization in district of Khurda, Odisha. Its aim for the welfare of the poor and needy people and adopting its program to redress the problem of the people, it identifies various problems facing by the youths, women, children & elder persons in the district of Khurda, Puri and Nayagarh. It is creating awareness among the people & the local inhabitants in the best possible ways through its dedicated personnel. Its main trust is to bring the under privileged sections of the society into the national mainstream and to provide a better standard of living with growth & development.

From its inception GJS has been engaged in the livelihood security of the tribal and economically section. GJS believes that development can only be initiated by people, can be achieved by people's initiative and sustained through their collective action.

Vision: Empower the community through participation involvement and equitable distribution of opportunities which will ensure a bridge between haves and have-nots' in our society.

Mission: To discover the disadvantaged community, organize them and chalk out plan to redress their need and ensure sustainable development by judicious use of human resources.

FORWARD

In the development process Gopinath Juba Sangha received tremendous support co-operation from different corners of the world. In this context we

are thankful to Govt. of India, Ministry of HRD, Dept. of Education, Dept. of women & child Development, Dept of Sports & Youth affair, Ministry of Food Processing Industries Ministry of Social Justice & Empowerment, State Social Welfare Board, Orissa, OPEPA, Development agencies NGOs. SHG & Sangathans, Govt. Officials & others for nation building activities

Successful running of all activities are possible because of the fairness effort and hard work of GJS members, staff & volunteers under the guidance & advice of Board of Management. So we also take this opportunity to extend our sincere application and thanks to all concerned for their willing co-operation & whole hearted support

Our special mention goes to the project area for their co-operation and guidance after difficult conditions & circumstances

We would like to place on record the services rendered by many whose name are not mentioned but for who our heartfelt gratitude remains.

We hope this report makes a modest attempt to present an overview of the key achievement accomplished during the year 2012-13

In this time interested person are coming and utilize his/her time for reading. Near about 40 persons are coming regularly to library.

ACTIVITIES UNDER URBAN SLUM HEALTH PROGRAM

OPD service

With the support from NRHM, Odisha & BMC, Bhubaneswar the Gopinath Juba Sangha (GJS) manage Urban Health Centre at KARGIL BASTI in ward No. 30. GJS provide curative service like OPD services and referral services to the slum inhabitants with free medicines. As per the norms of NRHM, Odisha one part time Doctor, one Pharmacist and one Staff Nurse are engaged and rendering the OPD services. The OPD opens at 8.00 am to 12.00

Noon & 4.00 pm to 6.00 pm at each working day except Sundays & National holidays. **12070** no of patients have been attended through the year.

Referral Services

As envisaged in the fore going paragraph, complicated cases like accidental cases, diarrheal diseases, malaria, TB, institutional delivery, sterilization cases etc are being referred to the nearest Govt. hospitals, dispensaries and First Referral Unit (FRU). In that process GJS develop a referral slip for referred patient for tracking information for monitoring. During this year Urban Health Centre provide **785** cases as referral.

Outreach Health Camp

As per USHP guideline we have organized outreach health camp in slum area (those slums are inconvenient to access OPD service) in fixed day like every Saturday with advance intimation and motivation in the particular slum by the Link Volunteers. Similar facilities like general health check up and free medicines are being provided in this camp. These camps are being managed by the Doctor, Pharmacist, ANM and Link Volunteers. **2067** no of patients have got benefited on **27** no of outreach health camps during the year 2012-13.

Immunization Program

As per Govt. schedule our Link Volunteers and ANMs are motivating the beneficiaries like Pregnant Women and parents to attend the immunization sessions. In that process link Volunteers and ANMs are inform to the beneficiaries before one day and also immunization day our staffs visit to slum and door to door campaign to ensure immunization as per due list. Apart from our staffs are engaged also special Immunization program and ensure dropout/left out beneficiaries as per Govt. schedule. During this year we are covered **1500** beneficiaries in **86** no of immunization sessions by our Link Volunteers and ANM.

IEC/BCC

Demand generation will cover mass media, mid media and IPC and other community based activities such as BCC, as per the need of the project Mass media and mid media would be used depending on the availability of material from the public sector. However interpersonal communication towards BCC would form the basis of the program. In addition the project would organize street plays, wall painting (Swasthy Kantha) to communicate with the people and also conduct competitions and other

activities to increase community participation and awareness. This program will also create demand for services related to health and its determinants through various groups which already exist and also with the groups to be formed in the intervention area.

Antenatal Care

As per NRHM, Odisha guidelines GJS create awareness through our Link Workers and ANMs for early registration of Pregnant Women within 12 weeks, 13-28 weeks and 29-38 weeks are registered at Anganawadi Centre. In that process our staffs were participated the session and mobilize the pregnant women for early registration. If the women identified a complicated and high risk cases at the time of home visit our staffs are being referred to the nearest Govt. hospitals/ First Referral Unit (FRU). In that session we are counseling to beneficiaries on ANC, TT and safe Institutional Delivery. During the year 2012-13 we have of registered **548** no of

pregnant women in different trim star. _____

Postnatal Care

After delivery the project provided postnatal services to beneficiaries through our Link Volunteers and ANM. At the time of home visit our LV & ANM asking & counseling to mother on taking full meal 4times in a day, how many times change the pad, measure the temperature of child and colostrums fed to baby and continue exclusive breast feeding up to six month and also Examine to mother regarding discharge of foul smelling, feeds and cracked & engorged breast. After that advice to mother on child immunization schedule. During this year GJS provided **452** no postnatal services in our target area.

Institutional Delivery

As per Project Mandate our Link Volunteers and ANMs were create awareness in slum level through home visit and community meeting for utility of Institutional delivery instead of unsafe Home delivery. As per budget guidelines we are providing free conveyance charges to the beneficiaries for their movement to the nearby Govt. hospitals and First Referral Unit (FRU). During this year **332** cases of institutional delivery conducted.

CBD Outlet

For birth spacing our Link Volunteers and ANMs formed CBD outlet in 16 no of slum and organizing meeting regular interval. In this meeting our staffs to counseling the eligible couple and also adolescent girl

maintain spacing one child to another child by using of temporary method like oral pills and condom. We are providing oral pills and condoms to eligible couple every month through CBD out let. During this year total **2456** no eligible couples were benefitted under this program.

Family Planning

The small family norm has been largely accepted and internalized by the people of Odisha. Slum populations have limited access to family planning services. The aim of family planning is to reduce fertility rate. The permanent family planning is needed for that. In the project area, awareness has been created among the slum people to take permanent family planning methods like tubectomy and vasectomy. During the period, **1** no of family planning camp have been organized and **9** no of permanent family planning (tubectomy) have done.

Nutrition Health Education Day

In every month nutrition and health education day have been observing at 38 no of Anganwadi Centers in our project area. As per Govt. guidelines In this day all field level front line workers are present and organizing a mothers meeting and discussion exclusive breast feeding, complimentary and supplementary feeding. The ANM and link Volunteer supported to the front line workers in that particular day. They keep the weight of new born babies as well as the mothers. They also help in distribution of supplementary nutrition to the beneficiaries. no of such programs have been

attended by the project staff.

Impregnation of Bed net

The misquotes are one of the most preventive causes of Malaria. To control the malaria in slum the Govt. provides free medicines for impregnation of community owned bed net. The survey of bed nets have been conducted by the Link Volunteers in all 60 slums. We have already covered all the slums for impregnation of bed net. **7754** no of bed nets have already been impregnated by the Link Volunteers.

Activities under Health of the Urban Poor Project

We are implementing the Health of the Urban Poor(HUP) program in Bhubaneswar Municipal corporation, Bhubaneswar in 60 nos of slum under 09 (Nine) wards like 46,47,52,53,54,56,57,58,59 from 1st March 2012 with the financial support from Population Foundation of India, New Delhi and USAID –INDIA. The detail activities are as follows:

Survey and Research

After getting survey from Health of the urban poor. Our Cluster Coordinator starting the House Hold Survey, Mapping and Listing of 60 no of slums. In that process the cluster coordinator arrange a Meeting with Slum leader, AWW, ASHA and front Line worker of the slum and discuss about objective of the program and activities of the program. As per Instruction of HUP-PFI we are completed the survey. In slum wise from starting to ending through Left side. The detail survey as follows:

SI No	Ward No	No of Slums	Total House Hold	Total Population		
				Male	Female	Total

ORIENTATION AND REFRESHER OF LINK WORKERS ON HEALTH, WATER & SANITATION

We are organizing one day Orientation and capacity Building of link workers of Urban Slum Health Program (USHP) on Health, water, sanitation and nutrition on date 8th September 2012 at our project office. The main objective of the Program is to equip the participants with Appropriate knowledge and skills about Antenatal Care, Intranasal care and

Post Natal Care and WASH activities so That they can perform their duties effectively

- Knowledge about health following Life Cycle Approach (LCA)
- Know about determinants of health

- Understand linkages among the different determinants
- Knowledge about WASH activities.

period and also birth preparedness.

TRAINING OF REPRESENTATIVE OF MAS

We have organized training program for representative of nine MAS on 15th September 2012 in two batches in two places like Abhiram Nagar and Kedarpalli. This training we are covering MNCHN topic like danger sign. During pregnancy, Birth preparedness and Birth micro planning. The main objective of the program is to provide with appropriate knowledge and skills about Antenatal

IEC /BCC ACTIVITIES

Demand generation will cover mass media, mid media and IPC and other community based activities such as BCC, as per the need of the project Mass media and mid media would be used depending on the availability of material from the public sector. However interpersonal communication towards BCC would form the basis of the program. In addition the project would organize street plays, wall painting to communicate with the people and also conduct competitions and other activities to increase community participation and awareness. This

program will also create demand for services related to health and its determinants through various groups which already exist and also with the groups to be formed in the intervention area. In this regard we are organizing street play in 06 slums on MNCHN and WASH activities and also complete wall writing and permanent board in 60 Slums.

HEALTH RESOURCES MAPPING

We have completed 60 no of Health Resource Maps in HUP intervention area. In that process we are develop the Health Resource Map through organizing MAS meeting and discuss with all members and identify resource available in slum area like AWC, Health facilities, water facilities, sanitation facilities and Different type of community resources. Health Resource Map is used for tracking the pregnant Women and children below one year of age for Immunization. MAS members divide the slum Households among themselves and

identify pregnant women and children below one year of age in their area which are then denoted by sticking bindis on the map. The smaller bindi denotes the status of two Tetanus Toxoid injections in the

pregnant women and the large bindi denotes the vaccination status of the child.

WARD COORDINATION COMMITTEE MEETING FORMATION AND STRENGTHENING

The Ward Coordination Committee is an institution/community level platform at Ward level in the city to address grassroots level issues related to health and its determinants like nutrition, water and sanitation through participatory community action. The ward being

the lowest level point of planning and convergence of services/programs provides scope for linkages between service providers and community. The 74th amendment of the constitution (1992) ensures provision of ward committees in all municipalities/corporation having population more than three lakhs. It is considered as an apex body for the convergence of services/programs related to MNCHN and WASH. Hence on the above back drop, Health of the Urban Poor (HUP) Program facilitates formation of Ward Coordination Committees in its intervention wards in Bhubaneswar City. It is primarily constituted with the objectives to provide a common platform to all ward level stakeholders for planning and monitoring of services and programs and establish linkages of the community with service providers.

As such an attempt was taken to form the Ward Coordination Committee in Ward No 47 in the city. Gopinath Juba Sangh the HUP field partner NGO in close association with and guidance of HUP City Office initiated the process on the way back in September 2012. In the initial period, efforts like discussing the matter with the Mayor/Municipal Commissioner and Ward Councilor made it possible to go ahead with the activity. Through a series of meetings, discussions, deliberations both by HUP City Office and Field Partner NGO, finally a date was fixed to convene the meeting for constitution of Ward Coordination Committee in Ward No 47. On an auspicious day of 18th September 2012, a preparatory meeting was convened at BMC Library, Bapuji Nagar, Bhubaneswar at 3.00 pm under the chairperson Mrs. Mahamaya Swain, Councillor. The other officials/front line workers present in the meeting were Slum Improvement officer, BMC, Community Organizer, Sanitary Inspector, Secretary and President of seven slums under Ward no 47, Anganwadi worker, ASHA, Secretary, GJS and City Coordinator & NGO-CBO Coordinator from HUP-PFI along with the Project Coordinator and all Cluster Coordinators of Gopinath Juba Sangh. With the initial introduction to the program and its objectives, the meeting started. As it was the first meeting, the modalities of constitution of the committee were elaborated in great length along with the needs and importance of the committee. Finally, it was decided to prepare a draft plan for WCC involving SIO, HUP City Team and Field Partner NGO that will be presented in the next meeting and necessary steps will be taken for formation of the committee. Similarly, next meeting for formation of WCC was organized on 18th December 2012 at the same venue and time and presided over by the Councilor. The selection of the members in the committee was discussed in detail. It was decided that core members from Government. Sector by designation and extended members from slum may be chosen for the committee. Accordingly, 18 members both from government and slums were chosen for the committee. This is just the beginning, once it is strengthened, it will certainly act as the planning and monitoring unit for effective delivery of services in improving the health status of the urban poor.

Distribution of Name Tag

As per planning we are distributing Name Tag to 250 nos Mahila Arogya Samiti Members of 21 MAS. MAS members are use this Name Tag as Identity card.

Distribution of Petty Assets

As per Project guideline we have already distributed Petty Assets to 60 Nos Mahila Arogya Samiti (MAS) in this year. We are providing a Cotton Dari, Permanent Banner (Flex), Box and 2 nos registers. The MAS are using the said materials at the time of Monthly meeting and keep record in box. These items are very useful for MAS members. This is the permanent assets of MAS.

INTERFACE OF COMMUNITY AND SERVICE PROVIDERS ON MNCHN AND WATSAN WORLD POPULATION DAY

We are organizing World population fortnight on dated 23rd July 2012 at kedarpalli basti under ward No-47 jointly by our Urban Slum Health program. In this occasion organizing event like quiz competition among Mahila Arogya Samit (MAS) on Maternal Health and Healthy baby show among 0-1 year children. After that we are organizing a meeting at kedarpalli with the following dignitaries like Corporater ward

No-47, BMC, CMMO Bhubaneswar municipality Hospital, Medical officer Urban Health centre, GJS, City Coordinator & NGO-CBO Coordinator, HUP-PFI & Secretary, GJS also Present and awarded to winners in this function. The main focus of the program is aware to mother and Community to adopt spacing method, small family norm and stabilize the population growth rate.
